SOCIAL SERVICES BLOCK GRANT
Emergency Appropriation: Hurricane Relief

As a result of the displacement of New Orleans and South Coastal US citizens due to Hurricanes Katrina and Rita, In 2006, the federal government made available funding throughout the United States to help states assist with the impact. Maine was granted \$67,995.00.

While Maine does have approximately 40 families who have relocated here, we have not been able to identify needs for this population that are not already being met through other avenues.

Maine does not have a plan to use these funds in FY 2007.

For historical reference, Maine also did not use these funds in FY 2006.
